## **Project Description**

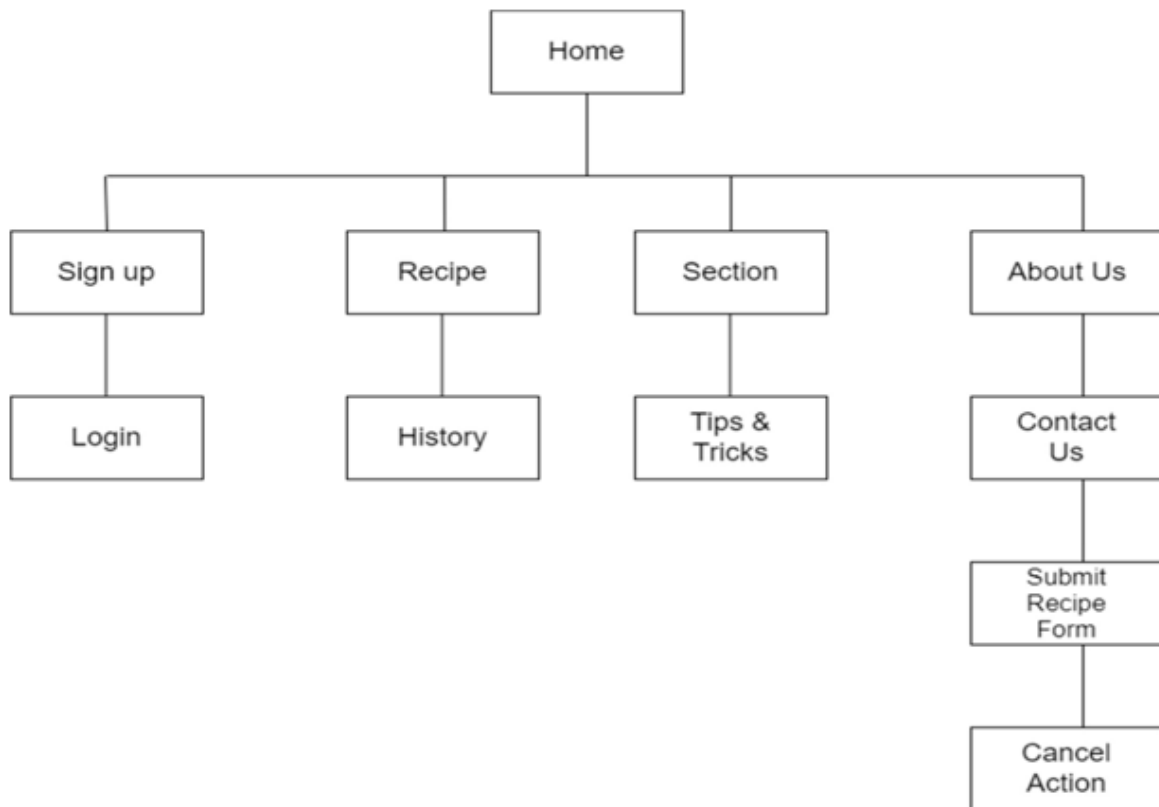

The theme that has been chosen by our group is Food specifically desserts. Our group has come to an agreement to start a mock website that shares recipes for desserts with other people. This website may help many people to learn to make desserts at home rather than buying them at bakery stores. In relation to Sustainable Development Goal 4: Quality Education, who knows that they are people who want to learn more about culinary and open a new bakery store to share their delightful desserts? From this, our world will produce more great pastry chefs.

Our website consists of 9 webpages which are homepage, sign up, login, recipe, history, section, tips n tricks, about us and recipe form submission. The whole concept of this website is minimalist and straight-to-the-point so that it will be easy for the users. The background color Night Rider which is suitable with warm bakery color theme. There are also white, cream, milky brown and dark moderate red. As for the font, we are going to use Montserrat which we will take it from the google font.

For the organizational flow, we have several steps in managing our organization. Firstly, we managed a sign up/ login form so that they can give comments and review and even submit their own recipes to our organization so that it can be shared with other users. Next, the users can also add the recipes that they wanted to do to favorite. They can also view the recipes that has been viewed before to make things easier.

Our website allows user to share their recipe by submitting it to us through the recipe form. We will then approve the recipe before displaying it at our website and put the credits to the user who is the owner of the recipe. Not to mention, users can contact us to promote their business and it will be charged for a certain amount.
